How to Study This Course Effectively

Learning Objectives

- Identify 3 key study habits that unlock the full benefit of this course
- Apply distraction management in your daily study routine
- Use repeated viewing to build stronger concept clarity

Quick Notes

- Distraction-free zone: keep your phone on silent or flight mode while studying
- Dedicated notebook: maintain a 180-page record note for class notes — this helps a lot during practical sessions
- Repeat viewing: watch each video 1-2 times — every repeat brings new clarity

Why This Matters

In an online course, there is no instructor physically present to keep you engaged. Self-discipline is the deciding factor. Without interest and involvement, even the best content will not help you progress.

Try It Yourself

Get a dedicated notebook for this course and title it "MMI GSA — EV Master Course." Start taking notes from the very next lesson onward.
